

AAPFCO Uniform Reports Committee

Our Goal

Paperless Fertilizer Tonnage Reporting by 2016

The Bad News is that it's 1 1/2 years away

The Good News is

1) UFTRS has been *fixed*

to import our standard text file

2) UDEAL has been modernized

to export new XML as well as proposed CSV file

3) States may find this a valuable tool

for accepting new AgGateway XML file

This work is currently called

uDealMobile

A Copy of “State Fertilizer Tonnage Reporting
Just Got Easier” for each committee member
30 copies total but it can be downloaded

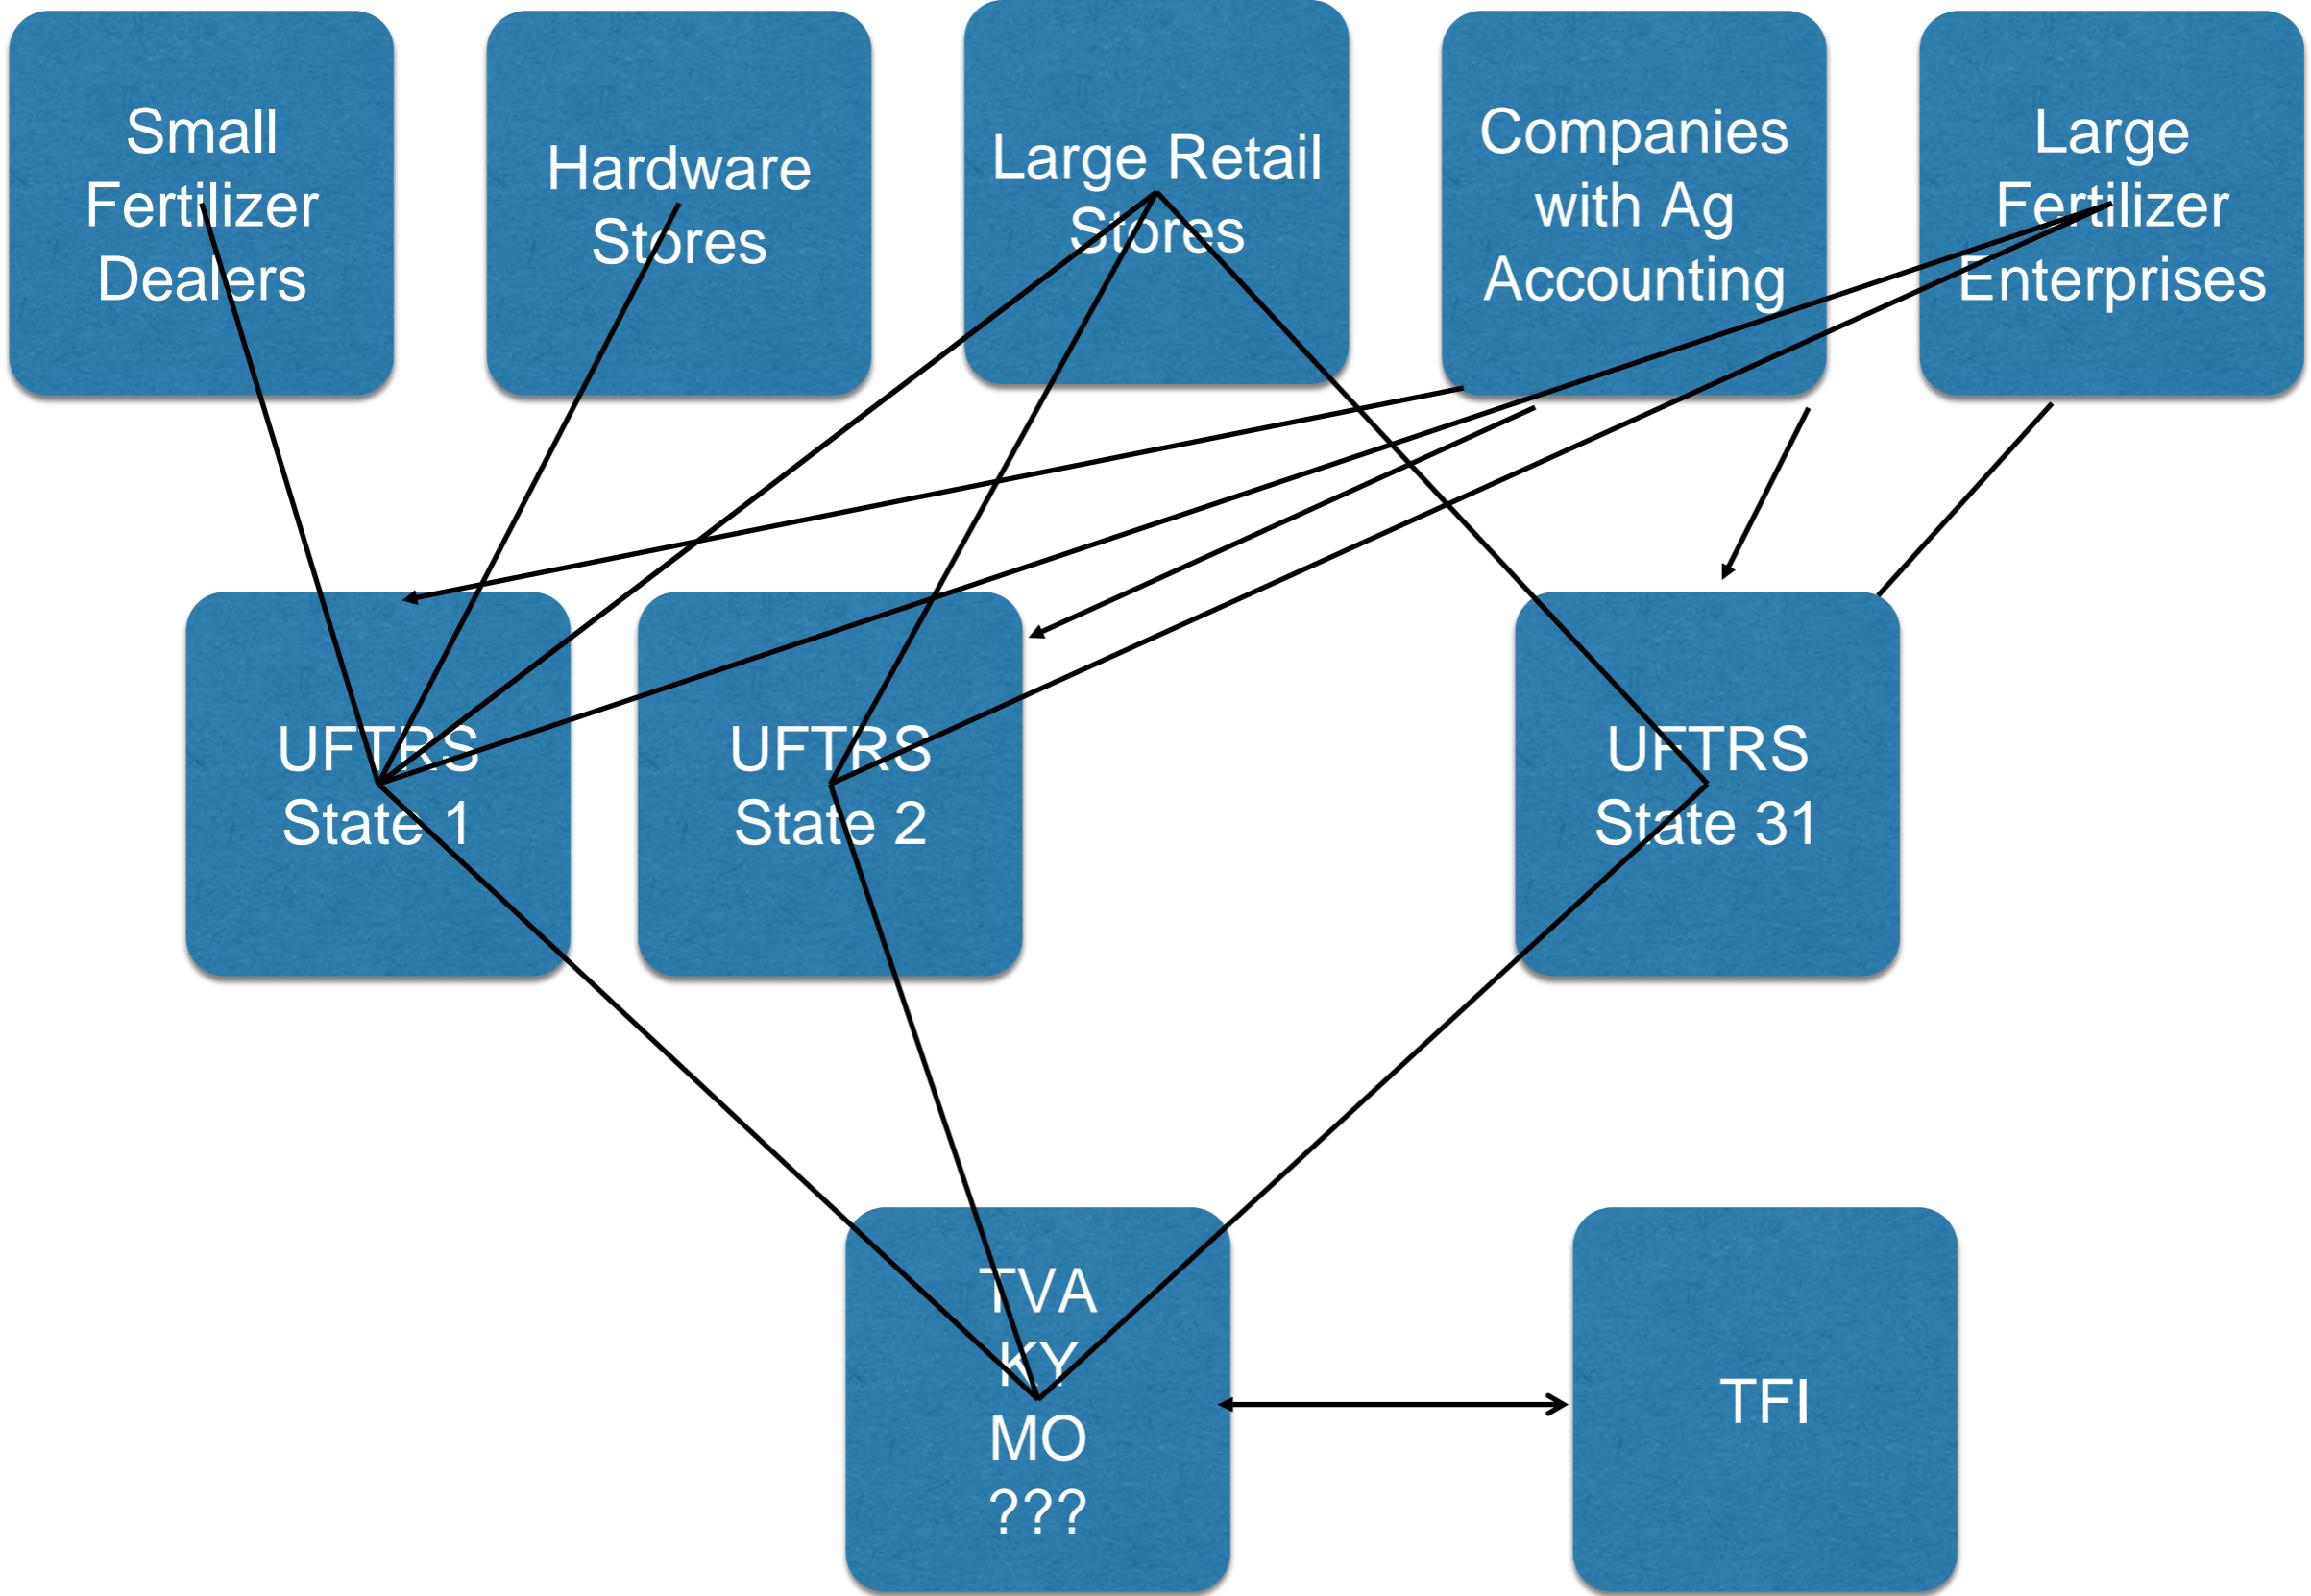

UFTRS.COM

The Product names will soon change to

uDealWin (Windows 7-10)

uDealMobile (Mac,iOS and Android)

uDealState (Connects to UFTRS backend data)

How is Tonnage Data Sent?

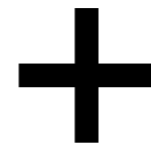

AAPFCO Standard Text Required (1-46)

AAPFCO Standard Text Optional (1-175)

AgGateway XML

AAPFCO Proposed Spread Sheet (CSV)

uDeal Sends all of these

uDeal Imports all of these

A powerful tool for states using UFTRS

Or States using other software that is UFTRS compliant

Bottom Line

States get Fertilizer data for their use

The Fertilizer Industry gets “Commercial Fertilizers”

We Should All be Proud of the many years in this report

Where do we go from here?

- 1) Download uDealMobile & the PDF
- 2) Run in Windows with sample data
- 3) Encourage your companies to do the same
- 4) Provide feed back on problems/suggestions

Lets make it happen by 2016
