E-Mail Address: brady@fractal-growth.com

Category:      New Fertilizer Material  New Term  Soil Amendment  Beneficial Substance

Submission's Proposed Definition:

“Cannabinoid Extracts”

Botanically unique substances derived from Hemp, Cannabis sativa, that benefit plants by increasing cannabinoids. The cannabinoids are directly bioavailable through the leaves and the roots functioning as a plant amendment. The substances have a molar mass of 314.41 g/mol, and act as a soil conditioner when miscible in ethanol with water.

AOAC or Equivalent Method(s) of Analysis (if applicable):

Please reference the following attachments: -Scope of Accreditation

-Method of Analysis

-AOAC Standards      -GREASE™ Analytic Testing Results

Submitted Research: (Minimum of 3 required)

Please reference the following attachments: - Experimental Data- Experiment 1,2,3 zip.

- Scientific Evaluation of GREASE™ and Related Label Claims

- Scientific Analysis of GREASE™ as a Soil Conditioner

- Bioavailability of ‘Cannabinoid Extracts’ on Cannabis sativa

Additional Research Citations:

Please see the attached Reference Folder for additional supporting information on the value of cannabinoid research and analytical methods as it relates to 'Cannabinoid Extracts'.
